

# Objects in Space

Sun

Mercury

Venus

Earth

Mars

asteroid

asteroid belt

Jupiter

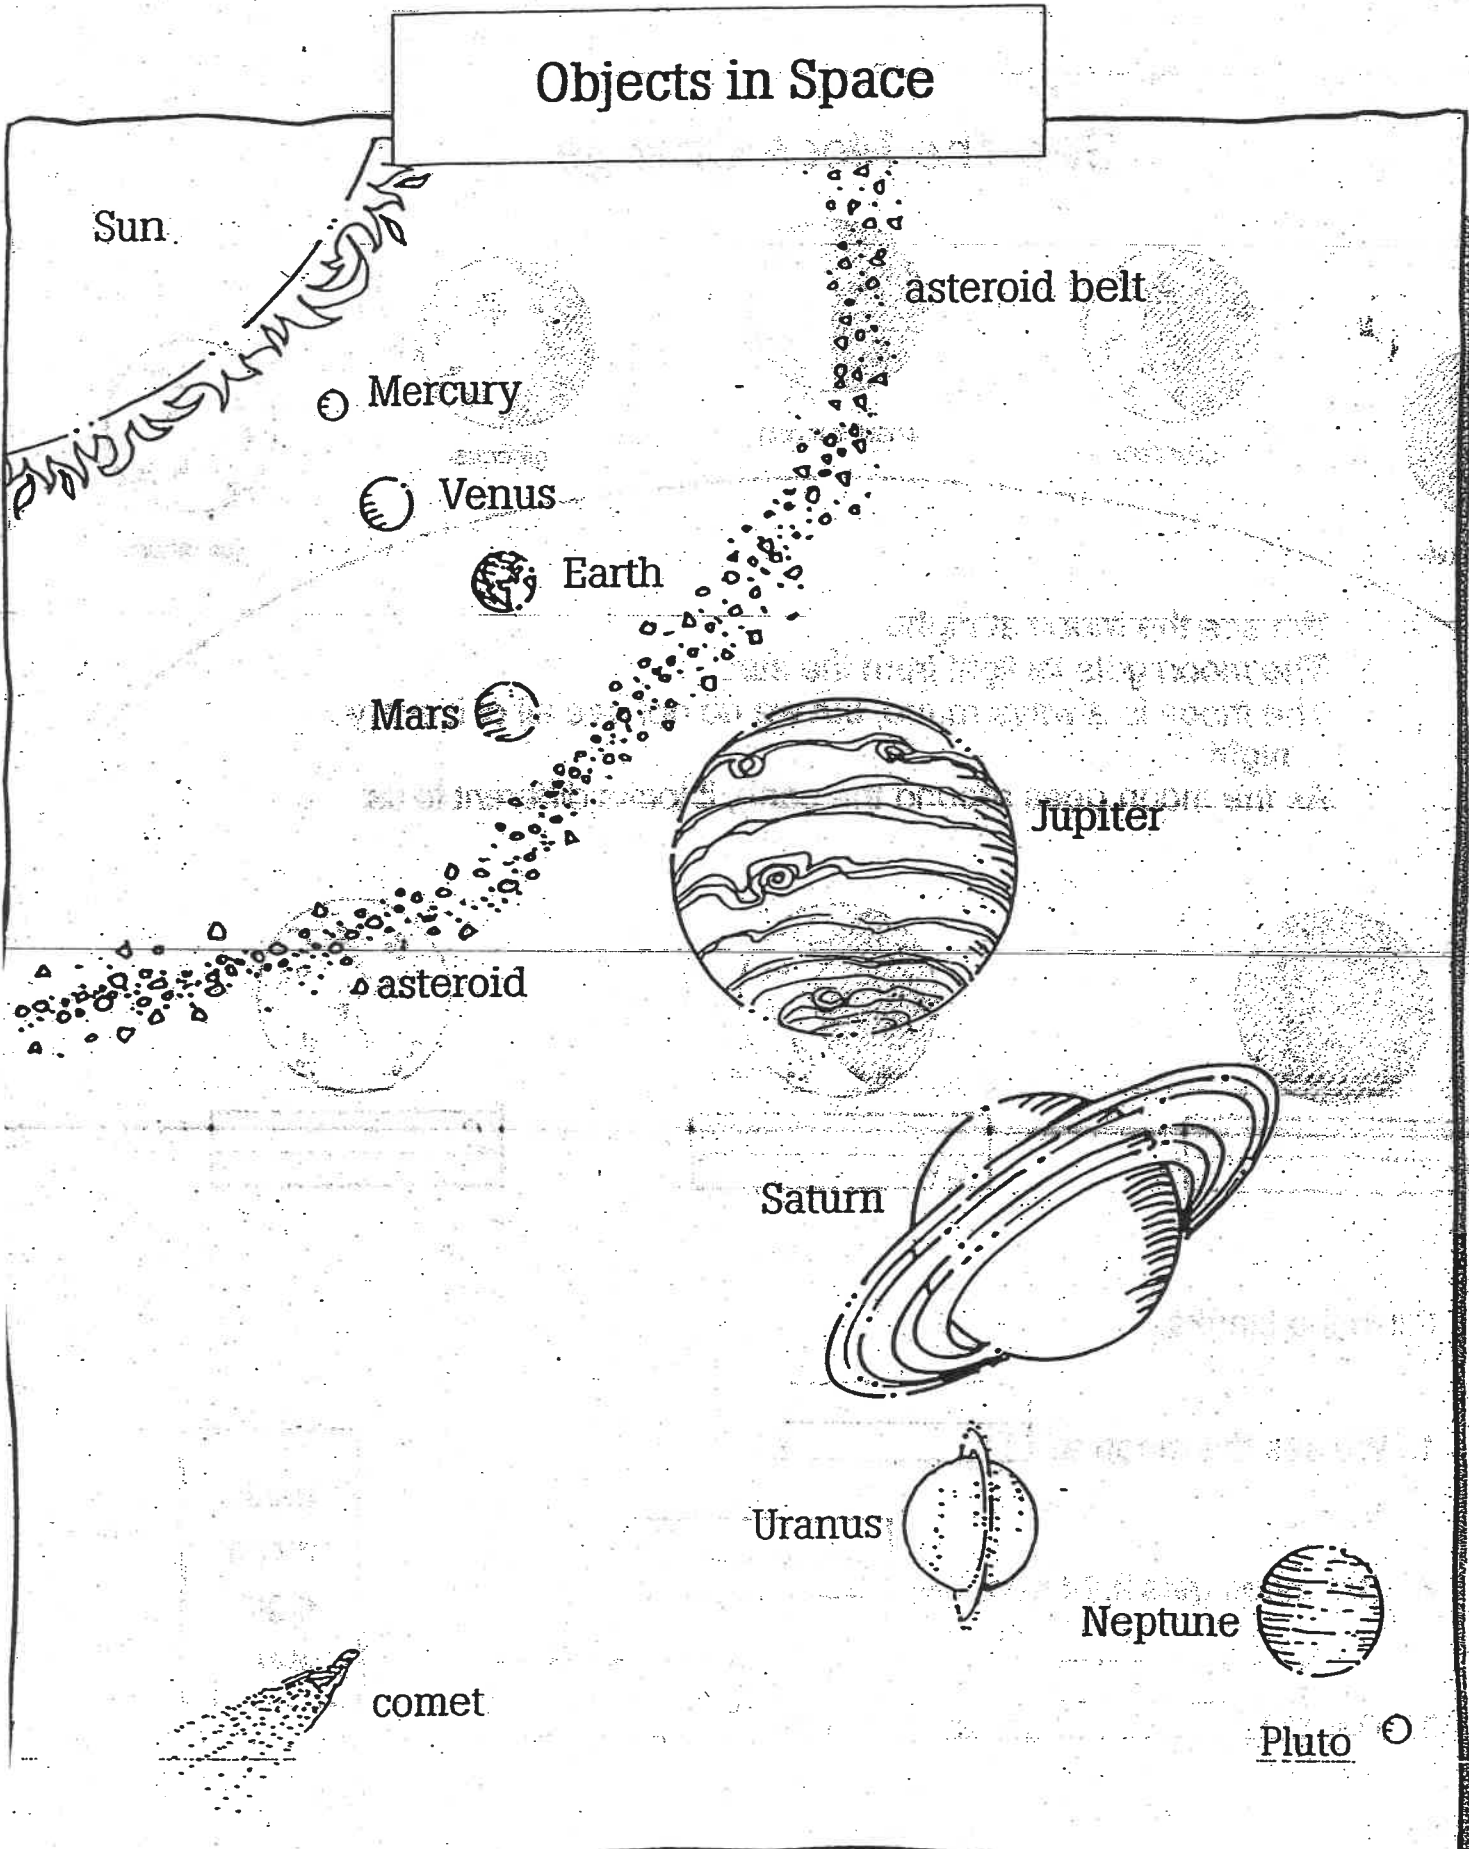

Saturn

Uranus

Neptune

Pluto

comet

Teacher: Sizes do not represent accurate relationships between the planets.  
Children will need a 12" x 18" sheet of construction paper cut in half the long way.

1. Paste the 2 pieces together. 
2. Draw the sun at one end. 
3. Color, cut out, and paste the planets in order from the sun.
